DANIEL MOTEJADDED

Junior Software Developer

About

Computer Science Engineer and Junior Software Developer focused on .NET and React. I enjoy building practical software, improving backend development skills, and expanding my knowledge of cybersecurity and secure application development.

Experience

PKO BP.

Warsaw

2026-Present

Junior Software Developer

- Develop and maintain internal business applications using C#, .NET, React and TypeScript
- Build and integrate REST APIs, database functionality and UI components
- Debug application issues and work with tools such as Swagger, Postman and Entity Framework Core
- Contribute to code reviews, automated testing, CI/CD and Agile/Scrum development

PKO BP.

Warsaw

2025-2026

Junior Analyst

- Analyzed and tested internal business applications and HR-related workflows
- Verified API behavior and investigated issues using tools such as Swagger and Postman
- Supported functional testing, bug reporting and validation of implemented changes
